RED VECTOR

PLATFORM DATASHEET

FULCRUM™ Platform.

Your security stack detects everything and understands nothing.
FULCRUM™ adds the context that makes it decisive.

CATEGORY
Insider Risk Management

DEPLOYMENT
SaaS · On-Prem · Air-Gap

COMPLIANCE
FedRAMP Ready · SOC 2 Type II

TIME TO VALUE
< 1 week

FULCRUM™ is the intelligence layer your stack is missing. While DLP and UEBA tools surface isolated events, FULCRUM resolves the **human context** behind them — combining behavioral baselines, entitlement data, HR signals, and organizational graph analysis into a single continuously-updated risk score per entity. Security teams finally see not just what happened, but who matters and why.

CORE CAPABILITIES

Real-Time Risk Scoring
0–100 entity risk scores updated continuously from behavioral, access, and contextual signals.

Context Enrichment
Scores weighted against role, peer baselines, entitlements, and HR signals — not just raw telemetry.

Behavioral AI
ML baselines adapt per entity, not population averages. No rules to write, no tuning cycles.

Investigation Workbench
Built-in case workflow: evidence collection, analyst notes, timeline reconstruction, audit trail.

Alert Prioritization
Risk-weighted alert queue eliminates noise. Analysts see the threats that matter, when they matter.

Executive Reporting
Board-ready risk summaries, trend analysis, and regulatory-ready audit exports on demand.

TECHNICAL SPECIFICATIONS

Ingestion rate	Up to 100,000 events / sec per node
Entity coverage	Unlimited; licensed per monitored entity
Data retention	Configurable 90 days – 7 years
API	REST · GraphQL · Webhook push
Encryption	AES-256 at rest · TLS 1.3 in transit
Authentication	SAML 2.0 · OIDC · MFA enforced

WORKS WITH YOUR EXISTING STACK

Splunk · Microsoft Sentinel · CrowdStrike · Okta · Palo Alto Networks · ServiceNow · Proofpoint · SailPoint · Workday · Active Directory · Azure AD

WHY FULCRUM™

12yrs
Threat detection expertise built in classified environments.

$9.4M
Average cost per insider incident (IBM 2025).

76%
Of organizations report an insider incident in the past 12 months.

ANALYST VALIDATION
"Treat Insider Risk as Human Risk"
Gartner, March 2026.

See FULCRUM™ running against your own threat environment.
Deploy against your existing telemetry — first entity risk scores in under a week.
